ATHARVA KULKARNI

Pune, Maharashtra | [Email] | [Phone] | [LinkedIn] | [GitHub / Portfolio]

PROFESSIONAL SUMMARY

Computer Science engineering student focused on data analytics, machine learning, and AI-powered applications. Building hands-on projects involving Python, SQL, data cleaning, exploratory analysis, dashboarding, and API-based applications. Seeking entry-level opportunities or internships in data analytics, data science, or machine learning.

TECHNICAL SKILLS

Programming	Python, SQL, Java (foundational)
Data Analysis	Pandas, NumPy, Matplotlib, exploratory data analysis, data cleaning
BI & Databases	Power BI, Power Query, DAX, MySQL, SQL querying
Machine Learning	Scikit-learn, Linear Regression, Decision Trees, KNN, Ridge Regression, model evaluation (MAE, MSE, RMSE, R^2)
Backend / AI	FastAPI, REST APIs, LLM API integration, prompt design (project work)

PROJECTS

Equity Insight — Stock Intelligence Platform

Planned / in progress | Python, SQL, APIs, machine learning

- Designing a platform to bring stock-related data and analysis into one place, with an emphasis on structured data workflows and useful insights.
- Planned extensions include model-driven analysis and an LLM interface; add only once implemented and tested.

Steel Supply Chain Analysis

Project work | Python, Pandas, DuckDB, SQL, data visualization

- Working with a large synthetic steel supply-chain dataset to explore supplier, inventory, item, and time-based trends.
- Building data-cleaning and aggregation workflows, including date normalization and monthly analysis.

VNL 2024 Men's Volleyball Analytics Dashboard

Power BI project | Power BI, Power Query, DAX

- Developed a sports analytics dashboard concept focused on exploring tournament data through interactive visuals.
- Practiced data transformation, visual design, slicers, and report navigation.

Personal AI Portfolio Chatbot

Prototype | Python, FastAPI, Groq API, Pydantic, pypdf

- Building a conversational portfolio that answers questions about a candidate using structured resume information.
- Planned capability: compare a candidate's documented skills and projects with a supplied job description.

EDUCATION

B.Tech, Computer Science | Savitribai Phule Pune University (SPPU) affiliated college, Pune
Expected graduation: [Year] | Current CGPA: [Add accurate CGPA]

ADDITIONAL

Interests: applied machine learning, data-driven products, analytics engineering, and AI application development.

Draft for editing: verify project status and descriptions, add contact links and graduation details, and remove any skill you cannot confidently discuss in an interview.
